

Bassam Rahat

Senior Software Engineer | C# / .NET, Angular, AI Integration

Phone: +92 323 4839988 | Email: rahatbassaam9988@gmail.com | Location: Lahore, Pakistan

LinkedIn: [linkedin.com/in/bassam-rahata060932177](https://www.linkedin.com/in/bassam-rahata060932177) | GitHub: github.com/Bassam-Rahat | Stack Overflow: [bassam](https://stackoverflow.com/users/100932177/bassam)

SUMMARY

Senior Software Engineer with 5+ years building multi-tenant SaaS platforms in C# and .NET (ASP.NET Core, .NET 8–10) with Angular, Next.js and React front ends, including leading a 15-developer backend team. Ships production generative-AI features on the Anthropic Claude API (sentiment analysis, AI writing assistants, web-search-grounded research) and builds AI-agent integration APIs and MCP servers. Strong in Clean Architecture, CQRS/MediatR, EF Core, PostgreSQL, SQL Server, Hangfire, SignalR, Docker and Azure DevOps CI/CD.

SKILLS

Languages: C#, TypeScript, JavaScript, SQL

AI & LLM: Anthropic Claude API, Generative AI, LLM Integration, Prompt Engineering, Tool Calling, Web Search Grounding, Model Context Protocol (MCP), AI Agent Integrations, AI-Assisted Development (Claude Code)

Backend: ASP.NET Core Web API, .NET 8/9/10, .NET Framework 4.8, ASP.NET MVC, Web Forms, Entity Framework Core, EF6, LINQ, Dapper, SignalR, MediatR, FluentValidation

Frontend: Angular (10–18), RxJS, Angular Material, Next.js (App Router), React, TanStack Query, Tailwind CSS, Ionic, Capacitor, Bootstrap

Architecture: Microservices, Clean Architecture, CQRS, Event-Driven Architecture, Multi-Tenant SaaS, RESTful APIs, Webhooks, Background Jobs

Data & Messaging: SQL Server, PostgreSQL, Redis, RabbitMQ, Hangfire, Quartz.NET

Cloud & DevOps: Azure, Azure DevOps (CI/CD Pipelines), Docker, IIS, Render, Vercel, Cloudflare R2, Git

Security: ASP.NET Core Identity, JWT, OAuth 2.0, OpenID Connect, IdentityServer4, RBAC, HMAC Webhook Signing

Integrations: Stripe, Moneris, SAP, Postmark, SMTP (MailKit), Sentry, Serilog, Google reCAPTCHA

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Nuclieos | Lahore, Pakistan

09/2025 – Present

- Lead full-stack delivery of client platforms: stakeholder work, Jira/Azure DevOps planning and code reviews.

SupportDesk | Help-desk SaaS (.NET 10, Next.js 16, PostgreSQL, Claude)

app.supportdesk.software

- Architected the platform end-to-end on .NET 10, PostgreSQL and Next.js 16 with Clean Architecture, CQRS/MediatR (109 REST endpoints) and tenant isolation; serves **3 tenants and ~10,000 tickets per month**.
- Integrated Anthropic Claude (Haiku 4.5) for asynchronous sentiment analysis of every inbound email (Hangfire, live SignalR updates) and an AI reply-polishing assistant with token limits and graceful fallback.
- Designed an AI-agent integration API so tenants can connect their own AI agents: hashed API keys, HMAC-signed webhooks with retry backoff, SSRF protection and race-safe ticket claiming; built a Node.js reference agent.
- Engineered email-driven ticketing with Postmark inbound webhooks, Postmark/SMTP (MailKit) delivery, RFC 5322 threading and idempotent ingestion; moved attachment uploads to background jobs on Cloudflare R2, **cutting webhook response time from 20.5s to 1.1s**.
- Developed a business-hours SLA engine (timezones, holidays, at-risk alerts) and presence-based ticket assignment as Hangfire jobs; containerized the API with Docker on Render and deployed the UI on Vercel.

My Race Setup | Motorsport subscription SaaS (.NET 8, Next.js 16, Claude, Stripe)

dev.myracesetup.com

- Co-developed the ground-up rebuild of a legacy product in a two-engineer team; set up the architecture (CQRS/MediatR, EF Core) and Azure DevOps CI/CD, and built **12 of 23 API modules (88 endpoints)** and their UI.
- Shipped the “AI Crew Chief” on the Anthropic Claude API: parts sourcing grounded in each racer’s data, live parts news via Claude’s web search tool and AI-drafted sponsor reports, using anti-hallucination prompt rules.
- Implemented end-to-end Stripe billing (Checkout, trials, promo codes, Billing Portal, signed webhooks, dunning) and moved the live legacy SQL Server database (79 entities) onto EF Core migrations.

Dasco Online | B2B e-commerce platform (ASP.NET Web Forms, SQL Server, SAP) dascosupplygroup.com.au

- Maintain three interconnected ASP.NET apps; enhanced the Web Forms (.NET Framework 4.8) B2B store and built two-way SAP integrations for orders, invoices, products and credit, handling **~50 orders per day**.

Dasco Sales & CRM Portal | Sales management system (ASP.NET MVC 5) sales.dascosupplygroup.com.au

- Developed bulk ordering, customer management, a pricing engine with margin validation and sales dashboards.

Senior Software Engineer | Devsinc | Lahore, Pakistan

03/2025 – 08/2025

- Led a **backend team of ~15 developers** and ran requirement-analysis sessions with stakeholders, turning business needs into technical specifications.

AmeriCorps | U.S. federal agency for national service (.NET, Angular, Azure)

americorps.gov

- Developed enterprise .NET applications with C#, ASP.NET Core, Entity Framework and Azure services, including database schemas and system integrations.
- Built Android and iOS apps from the Angular codebase with Ionic and Capacitor, with biometric login.
- Implemented unit and integration testing and improved application performance through tuning and refactoring.

Software Engineer | Insignia Business Solutions | Lahore, Pakistan

01/2023 – 03/2025

- Managed Azure DevOps CI/CD pipelines and IIS staging deployments, including SSL and post-deployment checks.

Teranet Undertakings | Multi-tenant property monitoring SaaS (.NET 9 microservices)

- Delivered the platform as **~15 .NET 9 microservices** with Finbuckle multi-tenancy, IdentityServer4, Entity Framework, RabbitMQ, Hangfire and Sentry, monitoring **10,000+ properties for 50 tenants**.
- Integrated Moneris for automated payments and SMTP email notifications, and automated monthly tenant reports and daily property subscription summaries.

DoDocs | Multi-tenant document management system (.NET, IdentityServer4, RabbitMQ)

portal.dodocs.ca

- Designed scalable REST APIs secured with IdentityServer4 in a multi-tenant microservices architecture serving **20 firms and ~100,000 documents**, with RabbitMQ messaging and Sentry error tracking.
- Sped up bulk document uploads with background jobs and optimized SQL Server schemas and queries.

DoClientPortal | Client portal with payments and accounting (.NET, Moneris)

login.doclientportal.com

- Led the Moneris payment integration for **~100 subscribers at \$250 each (~\$25K)** and built accounting features, email alerts and user verification.

Software Engineer | Tech Odds Global | Lahore, Pakistan

01/2021 – 01/2023

- Joined as an intern and progressed to Software Engineer on a **4-person team** building a school management system with ASP.NET Core REST APIs and an Angular front end.
- Designed PostgreSQL and SQL Server databases and implemented authentication and authorization with IdentityServer4 (OAuth 2.0 / OpenID Connect).
- Contributed to secure payment processing and multi-tenant SaaS features.

PROJECTS

MCP Server for AI Assistants | Client project | Node.js, Express 5, MCP SDK

mcp.mobileshalom.com | **2026**

- Built and deployed a public Model Context Protocol (MCP) server that lets AI assistants such as Claude search and read a client's WordPress content through 4 schema-validated tools over stateless Streamable HTTP.

KEA International Website | Independent project | Angular 18, TypeScript

keainternational.org | **2024**

- Created a responsive Angular 18 website with lazy loading, custom validation directives and Angular animations.

EDUCATION

Bachelor of Science in Computer Engineering

09/2015 – 09/2020

COMSATS University Islamabad, Lahore Campus

LANGUAGES

English (Fluent), Urdu (Native)
